Experience

Change Networks | Backend Developer

Dec 2024 - May 2025

- Developed a production-ready backend for Email Matrix using Fastify and MongoDB, securing endpoints with Helmet/CORS and environment configs—**reduced deployment errors by 40%** across 5+ environments.
- Engineered a queue-based bulk email pipeline with RabbitMQ and @fastify/multipart file ingestion, processing **100K+ campaign emails**—achieved **99% reliability** and scaled throughput by 3x during peak loads.

Sixnine Galaxies Ltd. | Backend Developer (NDA Protected)

May 2025 - July 2025

- Eliminated race conditions** in a high-concurrency casino backend using **ACID transactions**, ensuring 99.9% consistency for 1K+ daily financial and gameplay operations.
- Integrated **Redis caching** and **RabbitMQ** queues for real-time player updates on rewards, VIP levels, and affiliates—**reduced query latency by 50%** during peak traffic.
- Delivered live activity feeds via **Server-Sent Events (SSE)**—boosted user engagement by 30% through transparent, periodic streaming.

Freelance Web Developer

July 2025 - Present

- Developed and deployed production-ready sites for [Vikas Industries](#) using React and Vercel, ensuring 100% form reliability.
- Led backend migration for [Shoogle](#), optimizing data schemas and improving API response times by 25%.

Projects

Blogify – AI Powered Blog application [\[Link\]](#)

- Optimized data retrieval and system security by implementing **Redis caching** and **rate limiting**, which led to a 40% reduction in database load and secured authentication endpoints against brute-force attacks.
- Enhanced the content creation workflow by implementing the **Google Gemini API** for AI-driven suggestions and a **TinyMCE** rich text editor, which led to a 50% improvement in user drafting speed and overall content quality.
- Improved global media distribution and storage security by implementing **AWS S3** with presigned URLs and **CloudFront CDN**, which led to 30% faster image load times and ensured 100% secure access for 500+ hosted assets.

2D Metaverse – Virtual workspace for students [\[Link\]](#)

- Orchestrated a multi-step **Agentic RAG pipeline** (Metabot) using **Groq** and **AWS Lambda**, implementing confidence scoring and dynamic MongoDB filter generation to reduce LLM token costs by 60%.
- Engineered a real-time virtual campus with **Pixi.js** and Socket.io, enabling seamless player synchronization and **WebRTC**-based audio/video communication via PeerJS.
- Automated **zero-downtime deployments** on AWS EC2 using GitHub Actions and PM2, configuring an Nginx reverse proxy server for WebSocket and keep-alive headers.

Skills

Backend: Node.js, Express.js, Fastify, Socket.IO, Prisma, Redis, Zod

Database: MongoDB, PostgreSQL

Frontend: React, Tailwind, ShadCN, PixiJs, Motion, PeerJs

Deployment: AWS, GCP, Nginx, Docker, GitHub Actions

Programming Languages: Typescript, C++, Python, Bash

Tools: Git, GitHub, Postman

Education

• B.E. Artificial Intelligence and Data Science

Nov 2022 – June 2026

S.I.E.S. Graduate School of Technology, Navi Mumbai

CGPA: 7.00
