Experience

Change Networks | Backend Developer

Dec 2024 - May 2025

- Built a production-ready backend for **Email Matrix** using **Fastify.js** and **MongoDB**, secured with **Helmet/CORS**, supporting environment-driven configuration for smooth deployments.
- Designed a **queue-based bulk email pipeline** with **RabbitMQ** and file ingestion via **@fastify/multipart**, capable of processing campaign files with **100K+ emails** reliably and at scale.

Sixinine Galaxies Ltd. | Backend Developer (NDA Protected)

May 2025 - July 2025

- Built and optimized a **high-concurrency casino backend** with **MongoDB ACID transactions**, ensuring reliable financial and gameplay operations.
- Integrated **Redis caching** and **RabbitMQ background queues** to handle real-time updates for player rewards, VIP levels, and affiliate systems.
- Delivered **live player activity feeds** using **Server-Sent Events (SSE)**, enhancing transparency and engagement through periodic event streaming.

Freelance Web Developer

July 2025 - Present

- **Vikas Industrial Hub** [[Link](#)] – Developed a fully static React website hosted on Vercel, delivering a responsive and visually polished UI for the client's business.
- **Shoogle** [[Link](#)] – Leading backend migration from Supabase to a custom Node.js + Express.js architecture, enabling full control over APIs, data handling, and scalability. Coordinating with a small team of developers for feature implementation.
